June, 2009

Dear New Jersey Lottery Retailer:

The New Jersey Lottery is pleased to announce the arrival of our new Lottery equipment. As part of the contract with GTECH Corporation, who won the bid to provide new equipment and a new gaming system, **new Lottery terminal installations will begin this summer!**

The New Jersey Lottery has heard your ideas and concerns about our current Lottery gaming system. We made those concerns a top priority in the selection of equipment and a new—and greatly improved—Lottery gaming system. The arrival of new Lottery gaming equipment is the first phase of a two-step process, the second phase of which will include dramatic improvements to the software which drives the entire Lottery gaming system. The new Lottery gaming equipment, which will be arriving at your business within the coming months, will include the following:

- A new, state-of-the-art touch screen sales terminal;
- A thermal printer (no more ribbons to replace and very simple paper roll replacement);
- A 17" LCD monitor that will display lottery advertising, jackpot amounts, and customer sales;
- A self-service ticket checker (customers will be able to check their own tickets without clerk help);
- A handheld scanner for easier instant ticket inventory and ticket validation;
- A wireless electronic jackpot sign that can be mounted in your store window or other location that will automatically update top-prize information on all jackpot games;
- Terminal communications through satellite dishes. Each satellite dish will be mounted on a non-penetrating mount, so nothing will be permanently fastened to your place of business. The location of the satellite mount can occur on a rooftop or other location as agreed to by you and/or your landlord.

**All of this equipment—the new terminal, the new printer and monitor, the remote ticket checker, the sign, and the satellite dish—will be provided at no cost to you. Pictures and partial descriptions of the new equipment are attached.**

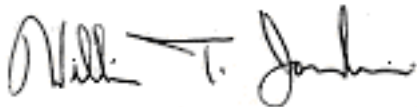

There are several important dates to remember. From late June through August 2009, GTECH representatives will visit your business to survey your site in preparation for the installation of the non-penetrating satellite mount. This satellite dish will replace your existing telco line which currently links you to the Lottery's gaming system.

After the survey, between the months of August and December 2009, you will receive a postcard in the mail from GTECH notifying you of the date for your training on the new equipment. Date, time and training site location will be provided, and **you must respond that you are attending. The new Lottery gaming equipment will not be installed unless you attend the training.** After the training, installers will arrive to install your new Lottery equipment. As an additional aid, we have also enclosed copies of the identification badges these surveyors and installers must show to you before beginning any installation efforts.

Throughout this year, the New Jersey Lottery will frequently reach out to you through your existing terminals and through correspondence. We will update you with information about your new Lottery gaming system and the training you will be receiving before the new gaming terminal is installed. Please feel free to call the Lottery at your convenience at 1-800-222-0996, or contact your Sales Representative with any questions you may have. Our toll-free number is open from Monday through Friday from 8 AM to 4:30 PM, and we look forward to answering any questions you may have about the new Lottery gaming system and what it means for your business.

The New Jersey Lottery considers you vital partners in fulfilling our mission “to raise revenue for maximum contribution to education and institutions benefiting the citizens of New Jersey through the sale of Lottery products.” We thank you for your continued dedicated efforts, and look forward to working with you throughout this process, which promises to transform the Lottery experience in our State.

Sincerely,

William T. Jourdain  
Acting Executive Director,  
New Jersey Lottery

### Jackpot Sign (interior)

Nothing drives sales like high jackpots! These wireless signs are brightly colored and communicate jackpot amounts to your customers. Best of all, they update automatically from your terminal!

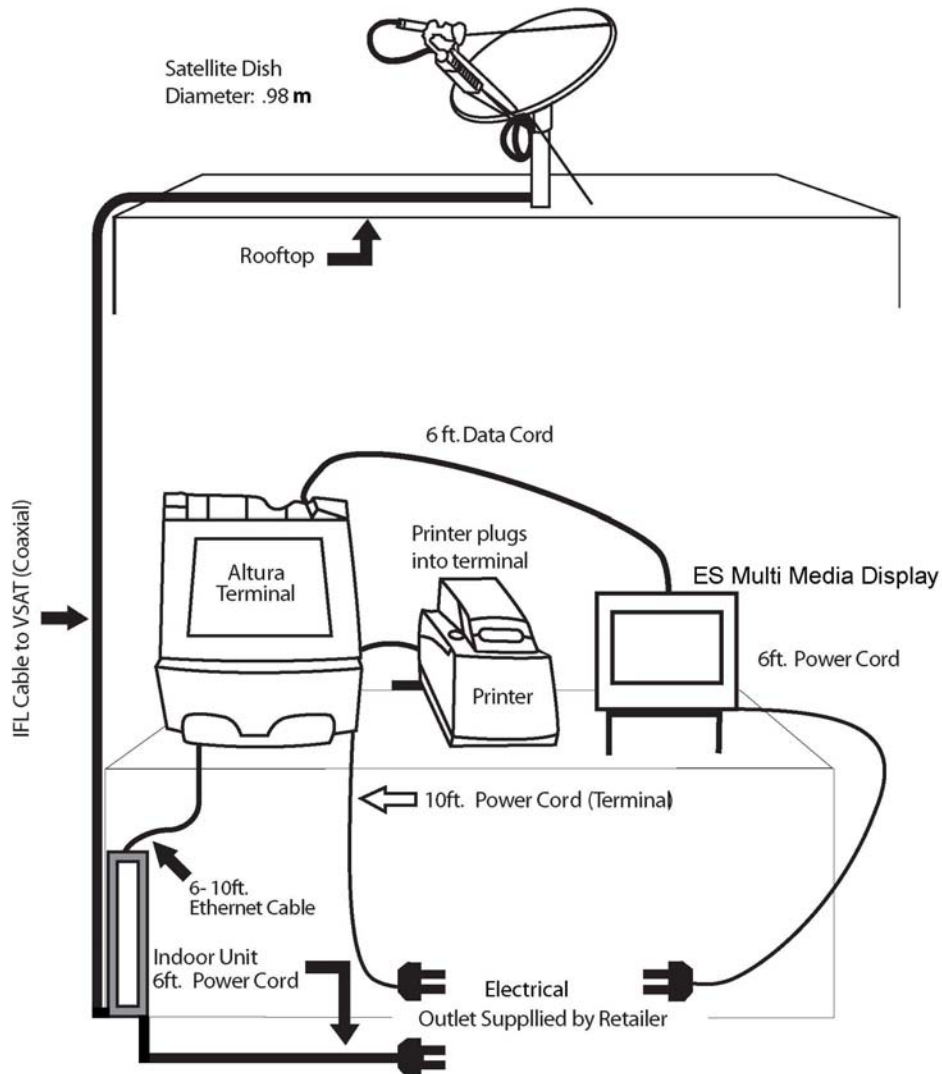

### Indoor Unit

This machine is the interface between the Altura Terminal and the wireless communications equipment. It usually sits under the counter close to the Altura Terminal, but can be placed in other locations in the vicinity of your terminal.

## Equipment Overview
